PRICE ADJUSTMENT FOR ASPHALT CEMENT AND FUEL P.L. 2009, c.187 CONSTRUCTION PROJECTS

Effective with contracts executed after May 1, 2010, the law follows procedures used by the State Department of Transportation to allow for increases and decreases in asphalt and fuel prices over the course of large construction contracts. The calculation is based upon 2007 NJDOT Specifications – Division 150 Contract Requirements, Section 160.01 through 160.03

The law requires that paving contracts involving more than 1,000 tons of hot mix asphalt include a contract provision that allows for price adjustments in the cost of asphalt. Fuel price

adjustments are based on DOT standards for the type of construction equipment and the work done by different equipment. For fuel price adjustments, at least 500 gallons of fuel based on the DOT equipment standards are required for a price adjustment, and then, only in those months when the price fluctuated more than five percent.

DOT maintains a web site of index rates for asphalt and fuel that are adjusted monthly. The law provides that when the quantity or equipment use thresholds are reached, fuel price adjustments are made, using the change in index rate from the time of bidding to when the work was performed. The change is treated as a "pay item" in construction contracts.
